Gunite® Automatic Slack Adjuster Inspection Instructions

Use the following instructions to inspect your inventory of Gunite® Automatic Slack Adjusters.

1. Remove the automatic slack adjuster from the box and plastic shipping bag.
2. Inspect the automatic slack adjuster in two locations to determine the lot number.
 - a. On the side of the slack adjuster housing you will see the name Gunite and either an "H" or "1H". See Figure A. This is the mold line nomenclature.
 - b. On the bottom of the slack adjuster you will see the lot number information. See Figure B.
 - c. If the combination of slack adjuster mold line and lot number exactly match any of the combinations in the table below, see Figure C, the slack adjuster must be returned to Gunite. Please contact Customer Service at 1-800-677-3786 to obtain a Return Goods Authorization (RGA) document.

		0L28	1H				
		0L30	1H				

Figure C: Lot Numbers and Mold Line Nomenclature

All slack adjusters having the combined lot number and mold line number identified in the table in Figure C must be returned to Gunite. Please contact Customer Service at 1-800-677-3786 to obtain a Return Goods Authorization (RGA) document.

Visual Identification of Inspected and Certified Parts

Any Gunite slack adjuster that has passed inspection can be identified by either a green dot appearing on the box, see Figure D, or on the part, see Figure E and Figure F, and / or a capital letter "C" at the end of the run number, see Figure G. This will signify the housing has been certified okay to use.
