

# KIC TRIDENT® Series Lightweight brake drum

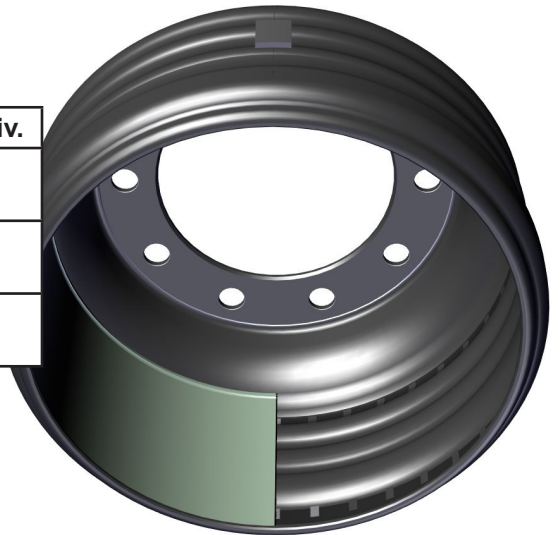

## Trident® by KIC

KIC's Next Generation Trident® series brake drum addresses the need for a lightweight, but technically superior, brake drum that will help North America's fleets cut costs and maximize payloads. The Trident® series composite steel shell brake drums are 20% lighter than standard cast iron drums.

Trident® features a steel shell and centrifuge cast braking surface technology

Our higher carbon steel shell is precision formed and we've also added knurling to the interior of the shell to provide the best fusion between the shell and grey iron. The shell is then mounted in a high-speed rotating fixture and the gray iron friction material is poured into the shell.

KIC Part No.	Brake Size	Weight	Meritor Equiv.	Stemco Equiv.
80002-018	16.5 x 7"	88 lbs.	53123537002 (93.5 lbs)	89996B (89 lbs)
80005-018	16.5 x 5"	73 lbs.	53123816002 (80.4 lbs)	600001 (75 lbs)
80008-018	16.5 x 8-5/8"	102 lbs.	53123771002 (103 lbs)	600026B (100 lbs)
