KIC LLC (KIC), (Seller) hereby warrants that, during the warranty period, the KIC extended cone hub assembly system (ROLLiant) will be free from defects in materials and workmanship. This limited warranty is extended only to the original purchaser who places the ROLLiant into service, and not to any subsequent owner or transferee of the product. These warranty periods are effective from the date of assembly indicated on the hubs. As a condition of eligibility for the ROLLiant extended warranty program, the Customer must provide specific data (full name of registered owner, mailing address, country of registration, phone number, email address, VIN, in-service date), no later than 30 days after the vehicle is put into service by the first owner. The warranty is void if users do not follow the most current version of the service and maintenance requirements. Refer to the ROLLiant maintenance manual for all service requirements which can be found at <https://www accuridewheelendsolutions.com/products/rolliant-bearing-spacer-system/>. If necessary due to malfunction, components that are serviceable without removing the hub such as the hubcap and gasket or drive-axle gasket can be replaced per the instructions in the service manual. If the hub must be removed for service, prior approval from KIC is required or the warranty will be voided. All scheduled maintenance related to hub units lubricated with semi-fluid grease or oil must be performed in accordance with the maintenance manual procedure. The hubcap gasket and bolt assemblies and PSI-equipped hubcaps are considered consumables and must be replaced after five (5) years. Upon request, Accuride will provide a free one-time replacement with the required 5-year maintenance.
