

**Best-in-class steel wheel refinishing  
with powerful corrosion protection.**

Your only single source for industry-leading wheel end solutions.

STEEL & ALUMINUM WHEELS | DRUMS | HUBS | ROTORS | SLACK ADJUSTERS

## Is Improper Wheel Maintenance Putting Your Fleet at Risk?

Maintaining the pristine appearance and performance of your steel wheels can get expensive, especially if you're refinishing them every 18 to 24 months. Wheel refinishing can be a high-cost issue for fleets, and finding high quality wheel refinishers is no easy task.

It's not simply a matter of applying a coat of paint. The wheel coating **process** is critical to provide the correct paint thickness on the mating surfaces of wheels. There is a well defined correlation between wheel nut torque loss and excessive paint thickness.

Many refinishers don't take the necessary care in handling the wheels during their refinishing process. It may be made of steel, but the wheel and its coating should be handled carefully to prevent the nicks, scratches and cracks that provide the exposure to corrosion.

## Accuride Quality. Accuride Assurance.

For those who want an OEM coating on their refinished steel wheels, Accuride has the answer. Our advanced Steel Armor™ coating combats corrosion with its revolutionary technology and superior finish. And now with ProFinish™ from Accuride, Steel Armor™ is available on steel wheels refinished by Accuride.

Switch to the ProFinish™ process and Accuride will apply our Steel Armor™ coating on your wheels under the same tight manufacturing process tolerances of a new wheel. We handle ProFinish™ wheels with the same care and attention as new wheels, ensuring the correct paint thickness and no nicks, scratches or cracks.

## Stop rust where it starts

Steel Armor's powerful combination of improved edge-enhanced epoxy e-coat and exclusive new powder coat further enhances both sharp-edge and general corrosion performance.

### There's no comparison

Which would you prefer? To **contain** corrosion - or risk unchecked deterioration of your steel wheels?

#### Corrosion contained

Steel Armor™ coating technology contains the growth of corrosion by blocking rust at the point of entry when gouges, chips, scrapes and scratches expose the metal.

#### Rapid expansion

Most refinishers apply one single powder coat over untreated bare metal. This is weak protection that allows rust to spread underneath the paint and across the wheel's metal surface.

#### ELIGIBLE SIZES

19.5 x 7.50

22.5 x 7.50

22.5 x 8.25

22.5 x 9.00

24.5 x 8.25

Contact your Accuride sales representative for program details and how to order.

## Warranty

Accuride warrants ProFinish™ steel wheels to be free of rust damage for twelve (12) months from the date of refinishing indicated on the wheel. Review the complete warranty to understand the coverage and ensure you qualify for ProFinish™ warranty eligibility.
