

## Gunite Silver Lightweight Brake Drum

Unparalleled performance, value and weight savings.

Your only single source for industry-leading wheel end solutions.

STEEL & ALUMINUM WHEELS | DRUMS | HUBS | ROTORS | SLACK ADJUSTERS

## Gunite's Silver Lightweight Brake Drum

Gunite has been a technology leader in the development and manufacturing of brake drums for the heavy-duty trucking industry since 1924. Over its history, Gunite has become the standard by which the industry measures brake drum performance. By continuing to develop new and better brake drum designs and manufacturing technologies, Gunite's engineers have helped the heavy-duty trucking industry improve brake performance and reduce operational costs. **The Gunite Silver Lightweight Brake Drum (4000X)** continues this heritage of performance. It delivers reduced weight at an affordable price point, all without compromising performance. That means dependable braking, built-in durability, effective heat dissipation, consistent quality, and longer life.

## Weight Savings vs. Standard Cast

We understand your need to manage total vehicle weight and operating cost while maximizing payload. We created the 99.5 lb. Silver brake drum to deliver the weight savings you need to increase payload and lower fuel consumption to achieve the lowest possible cost-per-mile. With its 12.5 lb. weight reduction per wheel end over full-cast drums – an 11% weight reduction – the Silver drum reduces a truck/trailer combination's total weight by 100 lbs. All this without sacrificing the quality and dependability customers count on from Gunite.

\* Based on use in standard drive and trailer axle applications.

### WEIGHT COMPARISON 16.5 x 7.0

3600A®X Full-Cast Standard	4000X Silver Lightweight Standard	9006X GOLD® Lightweight Premium
