

Accuride Reintroduces 24.5" x 8.25" Heavy-Duty Aluminum Wheel Part Number 40550

Accuride has resumed production of aluminum wheel part number 40550 for vocational and heavy-duty applications. With a greater load rating than a standard 24.5" wheel, it can withstand harsh conditions and is ideal for those applications that demand durability.

Part Number	Wheel Size	Disc	Offset	Valve	Weight (lbs)	Max Load (lbs)	Max Inflation (psi)
40550	24.5" x 8.25"	.950"	6.59"	DV545D	60	8,300	131

If you have any questions, please contact your Accuride sales representative. Thank you for your continued support of Accuride.
