## Accuride quality at a lower weight

As a leader in wheel technology, Accuride has once again set the standard for aluminum wheels by expanding our Accu-Lite® family of wheels to include five lightweight aluminum wheels. Accuride has utilized a new patent-pending aluminum alloy to reduce the weight of three part numbers by 3-4 pounds each; a 5-7 percent improvement overall. The new alloy employs an enhanced grain structure that improves strength so less material is needed.
