## Beware of Counterfeit Import Brake Drums

Accuride has found counterfeit import brake drums recently entering the US, Canada and Mexico markets are purporting to be 3600A®X, and 3922XUSA, Gunite's premier and value drums.

All genuine Gunite drums have the Gunite® logo, the 3600A® or 3922 part number, and Made in USA, cast into the drum, as shown in the photos below. The imported drums attempt to fool you with only the part number in the casting or the part number is painted on the drum. Drums with those markings are imitators violating our trademark on the 3600A®X and playing off our long-standing, well-recognized brake drum brand that has earned your trust on the road.

Remember that unless you are purchasing authentic Gunite brake drums, you could be exposing yourself to warranty complications. Should there be any question as to the authenticity, contact your Accuride sales representative. Thank you for your continued support of Accuride Wheel End Solutions.
