

**Now Enhanced for  
Better Protection**

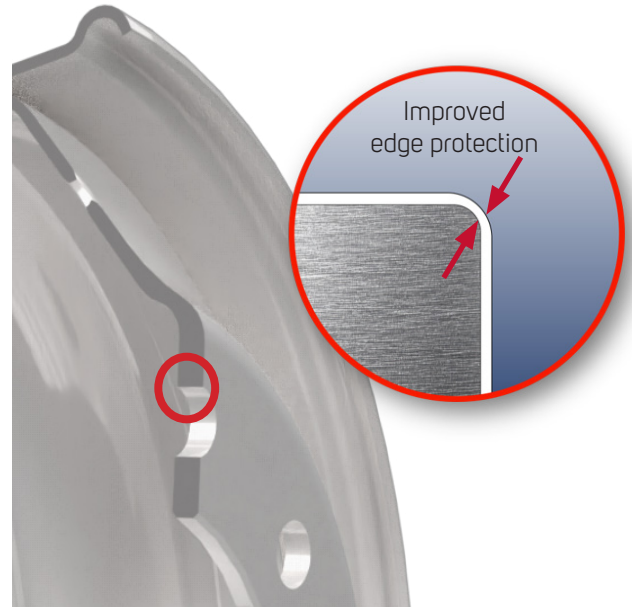

**Advanced coating technology engineered  
to fight corrosion and extend wheel life**

## Accuride has made the best even better.

Steel Armor™ already provides industry-leading corrosion protection, and now Steel Armor™ provides even better sharp-edge protection, so corrosion can't get a foothold. And the new Steel Armor™ uses less carbon to produce, so it's better for the environment.

With over 20 million wheels sold since 2014, Steel Armor's warranty is one of the best in the industry. Not that you'll need it.

Steel Armor™ steel wheel powder coating technology employs a proprietary three-phase protection process that is unique to Accuride. Improving the look and life of your wheels. That's Steel Armor™. It's the clear choice to ensure you get the maximum life from your steel wheels.

### 1 Zinc Phosphate

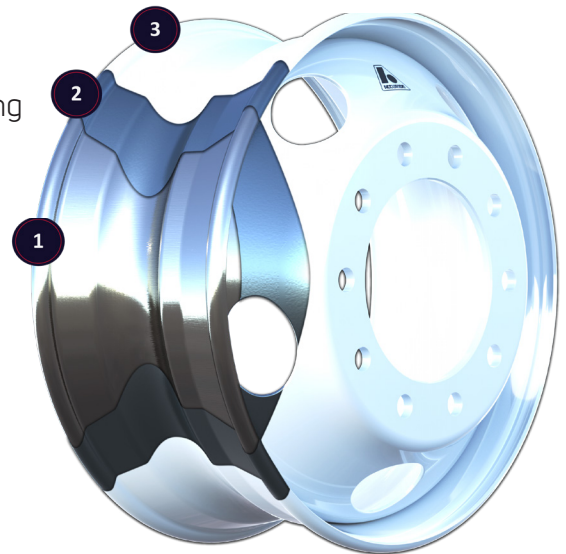

It all starts with our unique formula of tri-metal zinc phosphate – the same fundamental high-performance chemistry used by leading automakers – which prepares the metal for maximum adhesion.

### 2 Improved Epoxy E-coat

Next, we apply our best-in-class cathodic epoxy electrocoat (e-coat) optimized for sharp edge and overall corrosion protection.

### 3 Powder Coat

Finally, we spray on an exacting application of our premium powder coat, formulated exclusively for Accuride to meet the tough demands of the heavy truck environment.

**Your only single source for industry-leading steel and aluminum wheels.**
