ACCURIDE™

SUPERIOR CLEANABILITY!

Accuride set out to create an easy to clean wheel protection technology that would eliminate filiform corrosion on coated aluminum wheels while minimizing the damage from road salts and debris. All of this, along with a finish that lasts the life of the wheel...

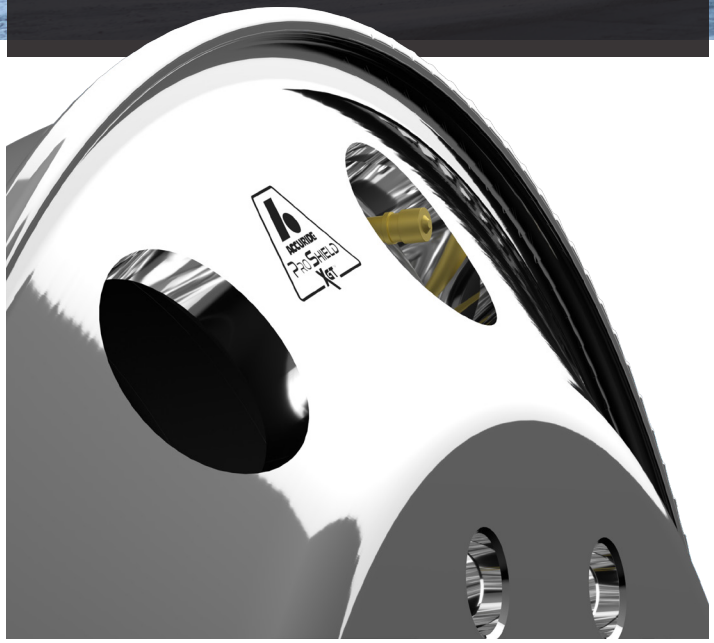

ProShield® XGT

The Next Generation of Wheel Protection

EXTENDED GLOSS TECHNOLOGY | CORROSION PROTECTION | IMPROVED CLEANABILITY

ProShield XGT® is a patent-pending aluminum surface conversion process engineered to deliver protection, durability, and visual appeal for commercial vehicle wheels. Developed in response to the increasing threat of filiform corrosion—especially from aggressive snow and ice chemicals—ProShield XGT® represents a significant advancement in wheel surface technology. ProShield XGT® eliminates significant filiform corrosion on aluminum wheels, withstands extreme road conditions, and extended gloss technology maintains a factory-gloss finish throughout the wheel's service life.

ProShield XGT® Protects Against the Harshest Conditions

- Mechanical – Chip resistant.
- Thermal – Maintains gloss up to 400°F.
- Chemical – Tested against acids, bases, and everything between.
  - 30W Motor Oil
  - Automotive Grease
  - Diesel Fuel
  - DOT3 Brake Fluid
  - Methyl Ethyl Ketone
  - Sodium Chloride
- Easy to Clean with Just Soap and Water.

ProShield XGT® Looks Better, Longer

In accelerated corrosion tests, we subjected ProShield XGT® to repeated exposures to a cocktail of popular deicing agents. Wheels with simulated damage, which extended all the way to the base metal, were put through 80 cycles of temperature, humidity, and drying exposures.

The result – after the equivalent of roughly eight years of abuse – shows no significant filiform corrosion.

FINISH OPTIONS	CODE
Extended Gloss Technology Improved cleanability, corrosion resistance, and enhanced shine	XGT

Please contact your Accuride sales representative for availability.

Your only single source for industry-leading steel and aluminum wheels.
